

DeNet is a part of TechCrunch in Berlin

5th of December, Berlin: DeNet, Hong Kong based company participates in TechCrunch Disrupt Berlin 2017, fifth annual European Disrupt conference. This is one of the largest TechCrunch events in Europe, which focuses on startups and the bleeding edge of technology.

DeNet company, which is developing a completely decentralized data storage & web hosting service, presented its high-tech project among hundreds of young companies which were exhibited in Startup Alley. DeNet aspires to build a fully decentralized network based on statistics from a semi-centralized model. Their decentralized platform will be available for both regular users and companies. DeNet sees its goal as building a decentralized hosting network.

"Disrupt Berlin 2017 features an impressive lineup of panels and workshops with world-known professionals of the European and global tech scene, so we are thrilled to be here."-says Paul Litviakov, CBDO DeNet. "It is great to meet so many passionate people in one location. API, mining, crypto applications, VR, AI and many more – we have found inspiration here"

Also, the DeNet team had a chance to meet David Wood in person, co-papa of Ethereum. DeNet representatives had great talks on the decentralized economy and its future. It was a pleasure to get confirmation from David that DeNet is moving in right direction.
